

gb5 s

elegant design married with proven reliability

AVAILABLE CONFIGURATIONS: EE | AV | ABR

AVAILABLE NUMBER OF GROUPS: 2 | 3 | 4

With a history dating back to 2005, the second generation GB5 carries on the spirit of the GB5 line: a machine rooted in classical European design, coupled with cutting edge performance. The new GB5 S features a revamped visual identity which modernizes the machine without sacrificing the look, premium feel, or dynamic elegance.

The two red lilies on the side shields recall the company's Florentine heritage while the front panel has been redesigned to increase group visibility. The machine offers the barista control over boiler temperature, brewing volume, hot water tap dose, automatic cleaning cycles as well as other options all thanks to next generation proprietary electronics.

The second generation GB5 is the first series of La Marzocco machines equipped with a water sensor that measures the conductivity and hardness of water as it enters the machine. This information allows the user to monitor water quality and verify filtration performance without the need for additional testing tools.

standard features

Dual Boilers

Separate boilers optimize espresso brewing and steam production.

Saturated Groups

Ensure unsurpassed thermal stability, shot after shot.

Dual PID (coffee and steam)

Allows you to electronically control coffee and steam boiler temperature.

Insulated Boilers

Reduce energy consumption while contributing to temperature stability.

Piero Group Caps **AV, ABR**

Re-engineered internal water path and flow-meter positioning that increase temperature stability.

Digital Display

Intuitive programming makes it easy to adjust machine parameters.

Programmable Doses **AV, ABR**

Auto-volumetrics ensure repeatability and consistency in high-volume settings.

Integrated Scales **ABR ONLY**

Precision scales built in the drip tray with the Drip Prediction technology provide a new level of consistency.

Water Sensor

Measures the conductivity and hardness of water as it enters the machine.

24V Electronics

New generation of electronics for improved reliability and machine diagnostics.

Easy Rebuild Steam Valve

Engineered so the valve can be serviced directly from the front of the machine without needed to be removed.

Dimmable Barista Lights **AV, ABR**

3-stage customizable intensity led lights for Eco, On and Brewing modes.

Eco Mode

Can be programmed to enter stand-by mode, improving energy efficiency.

USB

Making it possible to update the firmware.

Pro App Compatible

Electronic board that allows connectivity with the La Marzocco Pro App.

special order

Pro Touch Steam Wands

High performing steam wands that are cool to the touch.

Cup Warmer

Maintain espresso and cappuccino cups evenly heated at a proper temperature.

High Legs

Makes it easier to access beneath the machine.

Personalized Colors

Customizable colors based on the RAL color system, on request.
