

kb90

ultimate workflow

AVAILABLE CONFIGURATIONS: AV | ABR

AVAILABLE NUMBER OF GROUPS: 2 | 3 | 4

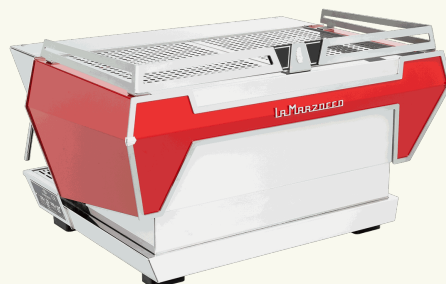

The KB90 is the ultimate evolution of the Linea PB form. Designed specifically to increase speed of service in the highest volume cafes while easier for the barista thanks to an improved workflow.

La Marzocco has redesigned the portafilter system to improve workflow

efficiency and to reduce the wrist strain of the user. Efficiency can also be increased thanks to Steam Flush: after each extraction, a burst of steam from the grouphead is followed by a flush of hot water, keeping the machine clean even in the busiest rush hours. This innovative function minimizes off

flavored buildup, and increases the time between having to clean the group.

The KB90 allows for a new level of expression in machine design, the panels have been engineered so that virtually infinite customization combinations can be created.

standard features

dual boilers

Separate boilers optimize espresso brewing and steam production.

independent saturated boilers

Separate saturated boilers for each group head allow barista to optimize temperature for individual coffees, ensuring thermal stability.

dual PID (coffee and steam)

Allows you to electronically control coffee and steam boiler temperature.

insulated boilers

Reduce energy consumption while contributing to temperature stability.

Straight In portafilter

Simplifies the motions to engage the portafilter and reduces the strain by 12 times.

Steam Flush

Keeps the group clean with an automatic burst of steam and a flush of hot water between extractions.

Piero group caps

Re-engineered internal water path and flow-meter positioning that increase temperature stability.

Pro Touch steam wands

High performing steam wands that are cool to the touch.

easy rebuild steam valve

Engineered so the valve can be serviced directly from the front of the machine without needing to be removed.

½ turn steam valve

Steam valve fully opens in ½ turn, requiring less movement for the barista to steam milk.

hot water economizer

Enables you to fine-tune the tap water temperature for tea.

digital display

Intuitive programming makes it easy to adjust machine parameters.

familiar interface

Enjoy the reliable, user-friendly 3-button keypad and proprietary electronics appreciated the world over, that makes programming intuitive for both baristas and technicians.

Linea PB logic

Based on the bestseller Linea PB, the KB90 is equipped with many of the trusted and tested components of the Linea PB, making servicing easier without the need for new parts inventories.

barista lights

Led lighting allows you to focus on your extraction and the cup.

eco mode

Can be programmed to enter stand-by mode, improving energy efficiency.

USB

Making it possible to update the firmware.

Pro App compatible

Electronic board that allows connectivity with the La Marzocco Pro App.

water sensor

Measures the conductivity and hardness of water as it enters the machine.

integrated scales

ABR ONLY

Precision scales built in the drip tray with the Drip Prediction technology provide a new level of consistency.

special order

cup warmer

Maintain espresso and cappuccino cups evenly heated at a proper temperature.

high legs

Makes it easier to access beneath the machine.

personalized colors

Customizable colors based on the RAL color system, on request.
